

FANUC ROBODRILL

You bought it for speed.....
But there's one more thing you Need !!!!

SpiderCool

Automated Directional Flood Coolant Nozzle

Eliminates the need to halt cutting, open the door, and reach inside the machine to manually adjust the flood coolant loc-lines located behind the spindle.

- Once aimed, automatically memorizes and precisely aims flood coolant for each tool loaded into the spindle by the ATC, regardless of length!
- Decreases part cycle time by eliminating all manual coolant adjustments!
- Increases tool life – cooler tools simply last longer!
- Safety – no need to reach inside the machine enclosure to adjust coolant loc-lines!
- Extremely easy to use, simply aim and click.
- Recommended by Methods Machine Tool!

User installable package, including all components, can be installed in 3 hours or less!
